Quick guide How to delete previous results (Vcheck V200)

- * The deletion method is the same as before.
- * If you would like to delete all the results at once, you can select [Delete All]. All the results will be deleted without the need for further action.
- * ① If the number of results you would like to delete are below 100, the deletion setting unit will be displayed as 100.
- 2 For 100 ~ 2,000 results, the deletion setting unit will be the total number of results.
 - (e.g., ① In case, 7 results are stored → Deletion setting unit will be displayed as 100,
 ② In case, 999 results are stored → Deletion setting unit will be displayed as 999)
 * The deletion setting unit can be set in units of 100.

* The calibration information will still be kept after deleting results.

1 Turn on the Vcheck V200 and select [Review].
